RAINBOW LIGHT MIXER WORKING MODEL

Light behaves like a friendly puzzle. When you shine Red, Green, and Blue lights together:

- Red + Green = Yellow
- Red + Blue = Magenta
- Green + Blue = Cyan
- RGB together (full brightness) = White Light

By adjusting how strong each colour shines, kids can make any colour on Earth!

This is called **Additive Colour Mixing**

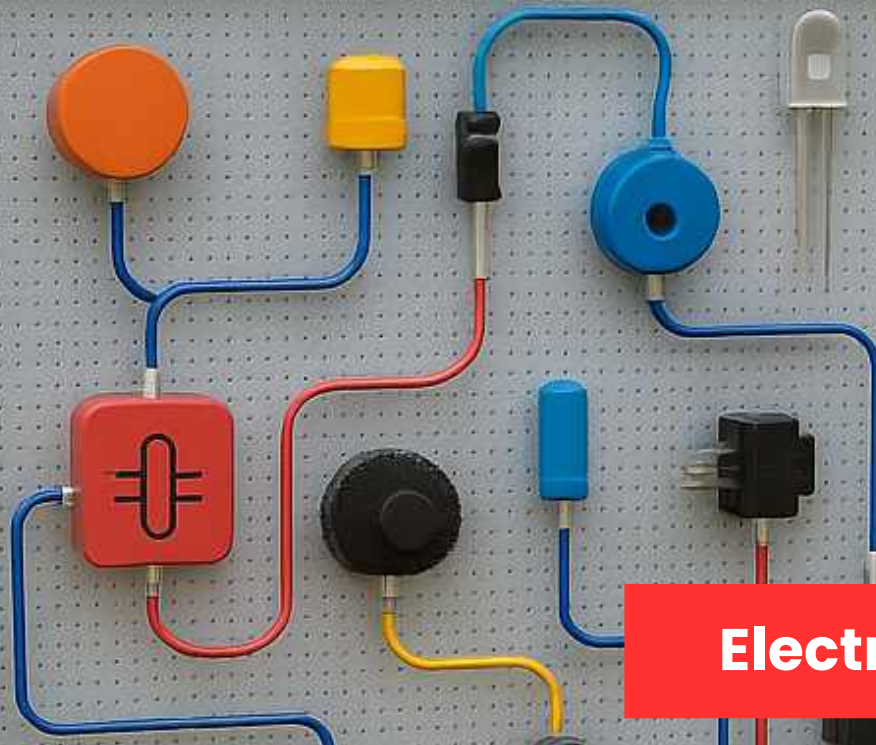

RGB Mixer

SDG Wheel

ELECTRONICS COMPONENTS

Capacitor
-Unpolarized

Capacitor
-Polarized

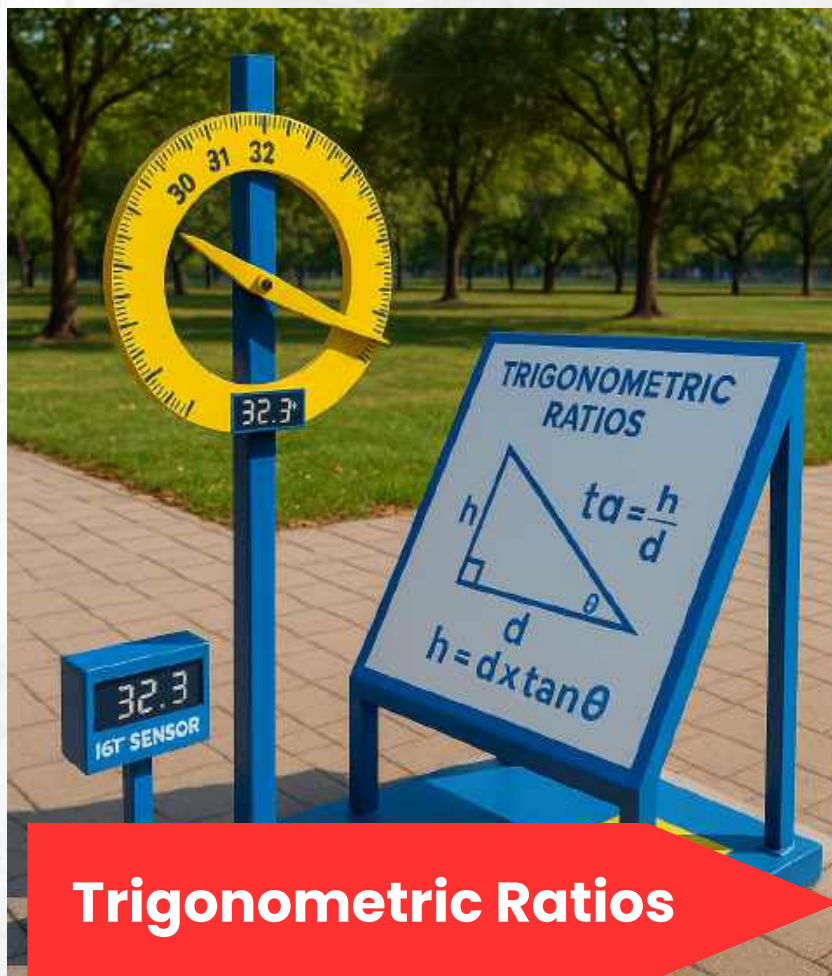

Diode

LED

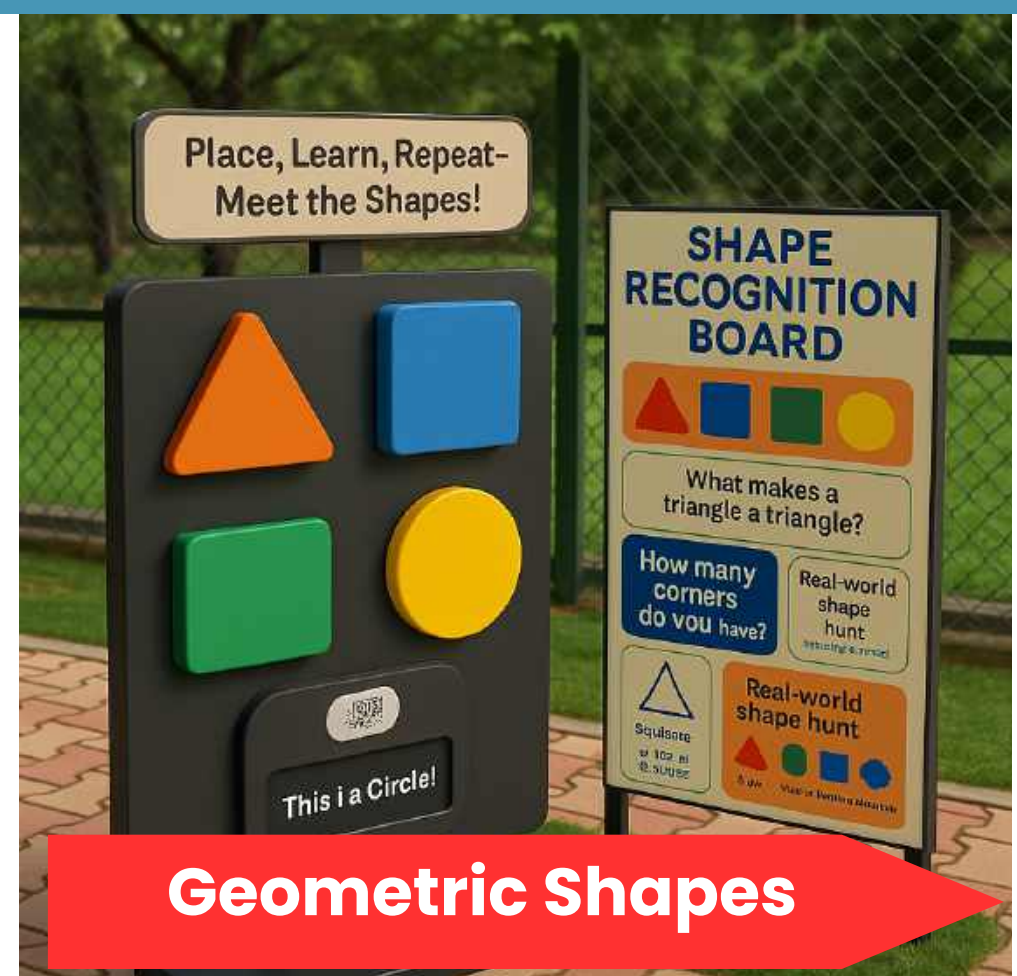

Photoresistor
